

Press Release – 26 September 2025

Karnov Group launches AI-enabled vertical solution for municipalities

Karnov Group AB (publ) has launched its AI-based solution for municipalities in Denmark and Sweden, making caseworkers significantly more efficient. The solution supports caseworkers with legal guidance, now integrating local regulations and Karnov's mission-critical local content in a workflow aligned with the specific needs of a municipality.

Karnov Group's strategy is to continuously enhance its value proposition with new opportunities for customers to interact with Karnov Group's mission-critical local legal content. The AI solution for municipalities is a cross-border collaboration between Karnov Group Denmark and Norstedts Juridik, with a common AI platform for scalability and local proprietary content for accuracy and reliability.

"Every day, caseworkers in municipalities work with complex decisions that directly impact local citizens. They need reliable legal guidance to ensure decisions are correct, consistent, and fair. Karnov Group has supported that mission for many years. Our new AI solution for municipalities, which is developed in close collaboration with municipalities, integrates local regulations and Karnov's expert-authored content in a unified solution, making it an efficient and reliable tool in all decision-making processes. This supports our mission to society and generates value for all stakeholders",
comments Pontus Bodelsson, President and CEO of Karnov Group.
