

Press Release – 15 October 2025

# Karnov Group launches next generation of AI-based services and expands into legal workflow solutions

---

Karnov Group AB (publ) has launched the next generation of KAILA, its AI-based solution for legal research, introducing workflow features through document analysis. KAILA improves customers' own documents, and the advisory is grounded in Karnov's trusted, expert-authored proprietary content. The launch further marks Karnov Group's expansion into legal workflow solutions, with a suite of AI-enabled legal workflow solutions planned for 2026.

KAILA was launched in September 2024 and is a market-leading AI legal research tool used daily by law firms, authorities and corporates across Denmark and Sweden. The solution will also be launched in France and Spain in the first half of 2026. KAILA is based on a common AI platform across Karnov Group for scalability and retrieves local proprietary content from each jurisdiction for accuracy and reliability. The new version integrates customers' own legal documents for analysis, reviews, risk identification and improvements.

*"The launch marks the first step in Karnov Group's roadmap towards a suite focused on end-to-end legal workflows, planned for release in 2026. The workflow suite will support legal professionals in all phases from case start, research, drafting, review and final delivery, and is currently developed closely together with customers. The workflow suite will have Karnov's trusted content as the anchor in all phases, seamlessly ensuring accuracy and reliability, while generating value for all stakeholders",* **comments Pontus Bodelsson, President and CEO of Karnov Group.**
